

Martin Valdivia
Sydney Australia
noways2170@gmail.com

Education:

6 Month Fast Track Bootcamp at Coder Academy earning a Diploma of IT (Currently)

Projects

<https://martinvald2170.github.io/> - Portfolio Website

Languages : HTML, CSS and JavaScript

Task Motivation App - <https://github.com/MartinVald2170/FlattenTheCurve>

Entered the FlattenTheCurve Hackathon hosted by ACS in 2020 and created a working product, demo video and a pitch video in 2 days to help combat feeling worthless during the CORVID-19 Pandemic

Languages : Ruby on Rails

Leftover Stone Organiser - https://github.com/MartinVald2170/leftover_stone_organiser-

A Ruby Terminal app that allows the user to store types of material and their location temporarily to keep track on where and what the leftover stock is

Language – Ruby

DSA Test Terminal App - <https://github.com/MartinVald2170/ruby-hackathon>

A Ruby Terminal app we created in a 1 day school hackathon that allows the user to take a DSA test and keep score on the answers to recommend the help they need

Language : Ruby
