Summary

I am a Full Stack Developer with experience within the hospitality industry. I have learned Ruby on Rails, Javascript and the MERN stack within the time frame of 6 months in a fast track bootcamp.

I want to develop my skills and use my current skills for your companies projects and goals. I am willing to learn what is needed and do my best to reach your companies expectations.

Education

Diploma of IT
March 2020 – July 2020

William Carey Christian School Graduating Class of 2013

Tech stack :
Ruby on Rails, HTML, CSS, JavaScript and MERN (MongoDB, Express, React and Node.js)
GitHub , Puma , Webpacks , PostgresQL , Trello , HHTP/Rest services, JSON, MVC framework, AWS, ES6, ECMAScript, Jquery, API's

The boot camp has swapped to a remote work environment due to Covid which in turn gave me very important experience in working within group projects remotely and becoming proficient with GitHub

Udemy Courses Completed (With Certificates)

Docker Course for Beginners – https://www.udemy.com/course/docker-container-course-for-beginners/

Projects

Leftover Stone Organiser (With Proper Documentation)
https://github.com/MartinVald2170/leftover_stone_organiser-
This terminal app I designed will solve the issue of disorganised leftover stock from used slabs of stone within the work flow of a large scale stone company.
It will allow the authorised user to add stock kept after being used for a job with the values of the name, type, colour, batch number and location.
Teck Stack: Ruby

Hackathon Task Motivation App
https://github.com/MartinVald2170/FlattenTheCurve
With a team of 6 I entered the FlattenTheCurve Hackathon led by the ACS to create an idea that help others during this pandemic. We decided on an app that motivates you to finish daily tasks.
It will allow the user to be rewarded and motivated to complete daily tasks that otherwise feel unrewarding. Designed for personal or business use on a larger scale.
Tech Stack: Ruby on Rails

Funko Pop 2 Way Marketplace (With Proper Documentation)

https://github.com/MartinVald2170/marketplace_assignment

For my first solo Ruby on Rails Project that took 2 weeks I created the basis of a Pop Funko specific marketplace that I want to turn into a social hub for casual and hardcore collectors to keep track of their collections and connect with fellow collectors

Tech Stack: Ruby on Rails

Storing and Grabbing Quotes API Web App

https://github.com/MartinVald2170/get-inspired-team9

A quote storing web app connected to a free quote API to create a quote of the day for the user we created as a group for a class Ruby on Rails Hackathon that took 2 days

Tech Stack : Ruby on Rails

Silvano Stone Website (in progress)

https://github.com/MartinVald2170/silvanostone

Building a website for the client Silvano Stone as a representation of their company. Used for selling services and to contact Silvano Stone.

Tech Stack : HTML, CSS

React File Tree

https://github.com/MartinVald2170/react_file_tree

React app to confirm my understanding of JavaScript and React to create a visual representation of a file tree with click events and JavaScript logic

Tech Stack : React, JavaScript
